Dear David

## **Product Acceptance: Cable Laying Frame**

Just to confirm our telephone conversation of 30.01.04, I list below the following points that apply to this product: -

1. The device is to be assessed against GM/RT 1310 only.
2. No formal product acceptance by Network Rail is necessary.
3. PAB certificate must detail the types of trailers that this device can be fitted to.
4. Manufacturers of the trailers must be made aware of this device and the intention to fit it to their trailers in case of any design considerations.
5. As point 4 but the use of this device must not invalidate any warranty or guarantee on the trailers.
6. Spindle diameter to be 75mm to fit 82mm spindle holes in cable drums (as per RT/E/PS/00005).

I have copied this letter to Amec in order that they take note of the points raised.

Will you please respond to the points raised and in due course, let me have a copy of the PAB certificate.

Yours sincerely

Peter Anderson  
Product Acceptance Manager
